

**Aesthetic Advantages**

Diamapro UV HS Plus is a clear, single component protective coating for concrete floors that cures instantly with a UV light. Diamapro UV HS Plus enhances the gloss level of your floor by filling in the pore structure of the concrete reducing light refraction. In addition, Diamapro UV HS Plus increases the effect of concrete dyes creating a large spectrum of color options.

*Diamapro UV-HS being cured with a Bulldog.*

**Cure Speed**

Diamapro UV Systems cure immediately upon exposure to a portable ultraviolet light source. It eliminates the cure time entailed with conventional coatings, which may range from 24 to 48 hours or more. Floors may be prepped, cured and put back into service overnight, on weekends, or during a single 8-hour work shift.

**Long-Term Durability**

Diamapro UV HS Plus has been specially formulated to provide excellent durability and

scratch resistance. With general maintenance, an extended service life can be expected from a Diamapro UV protected floor in heavily trafficked areas.

**Rejuvenation Process**

Restoring a Diamapro floor is easy and quick. Simply screen the floor using a Diamapro Diamapro-Screen, apply another coat of Diamapro UV HS Plus, and cure. No removal of the initial application is required.

*Diamapro UV HS Plus coating for concrete was tested to evaluate the effects of Eastman Skydrol® LD-4 airplane hydraulic fluid on concrete coated with Diamapro UV HS Plus. Skydrol® one of the most caustic chemicals for concrete had no observable effects from a 7, 10 and 14 day testing period.*

**Maintenance**

Diamapro Systems' coatings are impervious to cleaners and do not become slippery after cleaning. Cleaning agents may be selected according to the contaminant to be removed and will not compromise the Diamapro UV coating.

**Safety**

Diamapro UV HS Plus System has a low VOC content of 3.0 g/l; well below the strictest state regulations in the United States. Inhalation and flammability hazards are essentially non-existent. The cured surface meets National Floor Safety Institute certifications for coefficient of friction, ensuring pedestrian safety.

**Installation and support**

Diamapro UV HS Plus offers the flexibility to be

cured at any temperature, requires no primer coat, and has an extremely long shelf life. Certified Diamapro UV Systems installers are available nationwide. Comprehensive, hands-on factory training in surface preparation, coating application and curing ensures efficient, high quality installation.

## Diamapro UV Coatings-the perfect solution for your concrete floor protection

Diamapro System's UV HS Plus is a single component, ultraviolet light cured, low VOC aliphatic urethane. It is highly chemically resistant, and adheres exceptionally well directly to concrete. It's easy to apply, easy to cure, and drastically reduces downtime.

There is no more effective or efficient concrete and other resinous floor protection process.
