DIAMA-GUARD PSR PLUS

Solvent-Based, Penetrating, Water, Oil & Stain Repellent
With Microban[®] Antimicrobial Product Protection

OVERVIEW

DiamaPro[®] Diama-Guard PSR Plus is a solvent-based, penetrating stain repellent for all types of dyed and conventional polished concrete. The product forms a non-film-forming water-resistant barrier that blocks liquids from entering. It protects concrete against the penetration of oil and water-borne stains. Treated surfaces retain their natural texture and breathability.

ANTIMICROBIAL PRODUCT PROTECTION

DiamaPro[®] Diama-Guard PSR Plus is infused with Microban[®] Technologies. Microban[®] antimicrobial protection works to combat the growth of bacteria, mold, and mildew on product surfaces. It keeps floors cleaner and reduces odor by reducing damaging microbial growth before it can start. For applications where sanitation is crucial – such as cafeterias, restaurants, supermarkets, healthcare facilities, pharmaceutical labs, schools, restrooms, kennels, and veterinary offices - all DiamaPro[®] treatments with Microban[®] Technologies are the ideal solution.

DiamaPro[®] Diama-Guard PSR Plus with Microban[®] is the only penetrating sealer on the market which offers antimicrobial protection for a polished concrete surface.

FEATURES & BENEFITS

- Penetrating Stain Resistance
- 100% Breathable - Allows Water Vapor to Permeate from the Substrate While Blocking Water Droplets From Penetrating
- Minimizes The Penetration of Oil
- Low Odor, Non-Flammable & Low VOC (<5 Gr/L)
- Microban[®] Antimicrobial Product Protection
- Deepens The Color of Dyes
- Will Not Alter The Gloss Level of The Polished Surface or The Slip Coefficient of Friction On The Surface
- Product Is Ready-To-Use
- Provides Protection in Residential, Commercial and Industrial Applications

Coverage Rate: 2500-4000 sq. ft/ gal
Available In: 1 & 5 Gallon Pail
