MOISTURE CONTROL PLUS

Penetrating, Permanent Concrete Waterproofing Sealer
With Microban[®] Antimicrobial Product Protection

OVERVIEW

Diamapro[®] Moisture Control Plus is a penetrating, permanent concrete sealer that protects concrete coatings from moisture-related problems. This proprietary water-based formulation fills the pores below the near surface, controlling the rate harmful moisture vapor leaves the concrete slab that could harm surface-applied coatings and other moisture-sensitive flooring systems. This low VOC product can be applied to interior and exterior cement-based substrates.

ANTIMICROBIAL PRODUCT PROTECTION

Diamapro[®] Moisture Control Plus is infused with Microban[®] Technologies. Microban[®] antimicrobial protection works to combat the growth of bacteria, mold, and mildew on protected surfaces. It keeps floors cleaner and reduces odor by reducing damaging microbial growth before it can start. For applications where sanitation is crucial – such as cafeterias, restaurants, supermarkets, healthcare facilities, pharmaceutical labs, schools, restrooms, kennels, and veterinary offices - all Diamapro[®] treatments with Microban[®] technologies are the ideal solution.

FEATURES & BENEFITS

- Reduces Time Between Concrete Placement and Flooring Installation
- Improves Adhesion and Bond Strength Of Floor Coverings
- Increases Concrete Hardness and Density
- Microban[®] Antimicrobial Product Protection
- Provides Protection in Residential, Commercial, and Industrial Applications
- Product Is Ready-To-Use
