

# DP-ROG60+

## RIDE ON GRINDER

### Maximum Production in a Compact Design

The DP-ROG-60+ ride-on grinding and polishing machine was engineered specifically for the concrete prep and polishing contractor. The powerful 18HP Briggs and Stratton engine along with the magnetic plates allow the DP-ROG-60+ to tackle prep jobs. Complete with quick connection Velcro foam plates for resin polishing, the DP-ROG-60+ can tackle large polishing jobs quickly, and reduce labor costs.

Its vacuum hose attachment allows the unit to be run wet or dry. The machine utilizes a small, durable frame that makes it easy to transport around tight areas. The DP-ROG-60+ easily fits on trailers, or in the bed of trucks. With its sturdy lifting and transportation arms, there is no need to have a forklift on site for changing tools or moving the machine.

### DESIGN FEATURES

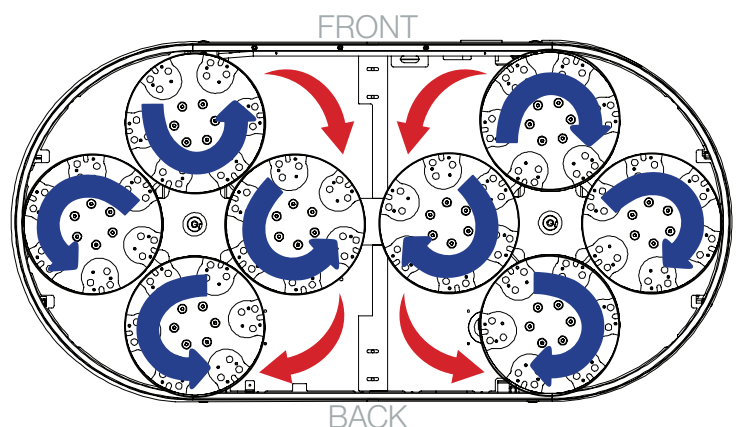

- 20lb Propane Tank Included
- 2 Side Transport Wheels and Lifting Arms
- 8 Magnetic Metal Tooling Plates
- 8 Foam Velcro Tooling Plates
- 2 LED Lights
- Dry Vacuum Attachment - 2.5" Camlock
- Y-Attachment for Dust Control
- Dust and Slurry Containment Shroud
- Electric Start w/ Battery
- Forklift Lifting Point
- Grease-less Bearings

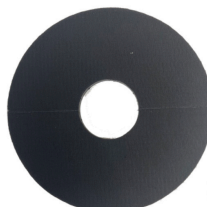

### SPECIFICATIONS

ENGINE	18HP BRIGGS & STRATTON
FUEL	PROPANE
WEIGHT	670 LBS, 750 LBS W/STANDS
GRINDING WIDTH	60"
NUMBER OF HEADS	8x12"
GRINDING PRESSURE	UP TO 1000 LBS*
DIMENSIONS	61" X 31.5" X 38"
PRODUCTION RATE	UP TO 10,000 SQ FT/HOUR

\*Weight of machine, stands, and operator combined.
