

SPEEDI-EDGE

SPEEDI-EDGE

Speedi Edge in use with a 5" HGX-5 hand grinder.

THE DIAMAPRO SPEEDI EDGE MAKES YOUR LIFE EASIER

Speedi Edge Max fits most 7" grinders

Speedi Edge Mini fits most 5" grinders

The Speedi Edge is a simple device that will transform your standard angle grinder or polisher into an effective planer! It is available in two sizes and is compatible with every grinder.

The Speedi Edge will enable you to transform your variable-speed grinder into an effective corner grinding device! Instead of a diamond grinding wheel, secure the Speedi Edge with the adjustable rod and you're ready to corner grind! Diamapro Systems™ has a large selection of diamond tools to fit the Speedi Edge!

HOW DO I FIT MY GRINDER ONTO THE SPEEDI EDGE?

Simply attach your grinder to the Speedi Edge using the 2 supplied bolts. The 2 spherical bearings on the Speedi Edge are to help you reach the angled fixations you may find on some machines.

The last step is to calibrate the Speedi Edge/Grinder assembly :

- Place on a flat surface
- Press the head of your grinder with one hand
- Release the break
- Position the block against the back of your grinder
- Re-clamp the break

Diamapro Systems™ offers a full line of Precision Diamond Tooling for both walk behind and handheld grinders. From Prep to Polish, we have everything you need.
